Lucerne is a green, leafy crop similar to clover. It is ideal as a well balanced horse diet as it has a high fibre, protein, mineral and vitamin content and has a high digestibility and good energy level. It is free from herbicides and pesticides.

Our lucerne is grown in the beautiful Richmond Valley using premium irrigation water and is, at the optimum time, cut and processed via our specialised cuber in the paddock. A water spray ensures there is maximum leaf retention in each cube thus reducing the dust content and maximising the goodness in each cube. The cubes store well and require only a third of the storage space compared to bales. They are vermin free and very easy to handle and transport.

LUCERNE CUBES

Mature horses, under light working conditions, need to consume approximately 1.5 to 2.5% of the horse's body weight daily. Our cubes can be soaked for easier consumption if there any concerns with aging or 'gutsy' horses. FEED TESTING—Analysis compiled by Agrifood Technology on 16/04/10 can be supplied upon request. Our cubes are comprised of approximately:

Protein	25.7%
Fibre	38.5%
Digestibility (DMD)	69.8%
Est. Metabolisable energy	10.4%

LUCERNE PRE-MIX

Our Pre-Mix contains crushed and rolled grains comprising the approximate quantities listed below:

Lucerne	42.5%
Oats	25%
Barley	15%
Maize.....	10%
Lupins	5%
Sunflower Seeds	2.5%
Canola Oil.....	1.5%
